

Wired For Reading

An Evidence Based Linguistics Program for Reading, Spelling and Vocabulary

Developed by Laura Rogan, M. A., M.Ed.

Wired For Reading's multi-sensory, systematic approach has a strong record of success for struggling readers both in and out of the regular classroom. At the same time, the program's engaging exploration of the architecture of English benefits all learners.

Wired For Reading Introductory Course

The WFR Introductory course offers an engaging, quick, but deep exploration of linguistics as it applies to teaching reading and spelling. It simplifies English spelling patterns without compromising them, thereby empowering students to fluidly break down words. Students learn to connect speech to sounds, sounds to letters, and letters to meaning.

For classroom teachers, special education teachers, tutors, paraprofessionals, instructional coaches, and parents of students with reading difficulties.

- Learn about the underlying processing problems that can create barriers to reading and spelling.
- Gain a well-established speech-motor base to teach phonological awareness.
- Discover memory-friendly and entertaining phonics stories to clarify letter/sound relationships across spelling patterns.
- Understand how word origin dictates spelling.
- Learn how to make non-phonetic words burn into the mind's eye using the best research based strategies.
- Better understand and respond to your students' spelling and decoding errors.
- Leave with graphic organizers for both the content and process of the program.

This is my 20th year teaching and I feel like I have a renewed passion for teaching reading. The information and research Laura teaches is incredibly valuable and provides instruction for all styles of learner.

Vicky Yousoofian, teacher

Laura's program provides a strong framework for instruction while allowing me the creativity to adjust toward individual student needs and my own teaching style. Her direct, yet engaging, multi-sensory approach to language instruction works.

Andrea Yee, ELL instructor

Laura approached the subject from many angles and tapped into every learning style. I left the course more confident and with the belief that all students can be helped, no matter how they struggle.

Leah Kaminski, Tutor, Editor, Writer

Burien Spring Intro: March 15-17 & March 29-31, 2012 (Thursday & Friday 4:30-7:45 & Saturday 8:15-4:30) in Highline School District.
